

Annex D – Tree Photographs

Photo 1 – Compression fork on willow tree (T1)

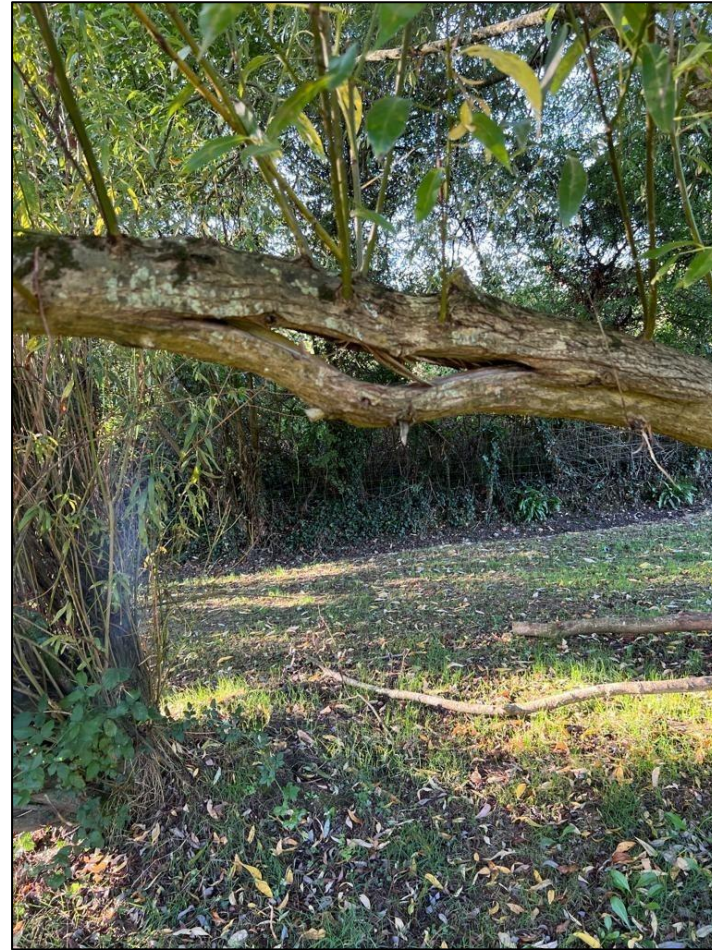

Photo 2 – Sheer fracture on long hazard beam

Photo 3 - Leaning willow scrub under the willow tree (T1)

Photo 4 – Overhang over the parking area from G1

Photo 5 – The overhang over the parking area and field entrance (G1)

Photo 6 – Compression fork on G2

Photos 7 & 8 – Compression forks on G2

Photo 9 – Standing dead ash tree (T2)

Photo 10 – Vegetation next to retaining wall (G3)

Photos 11– Vegetation next to retaining wall (G3)

Photo 12 – Overhang of trees from G4

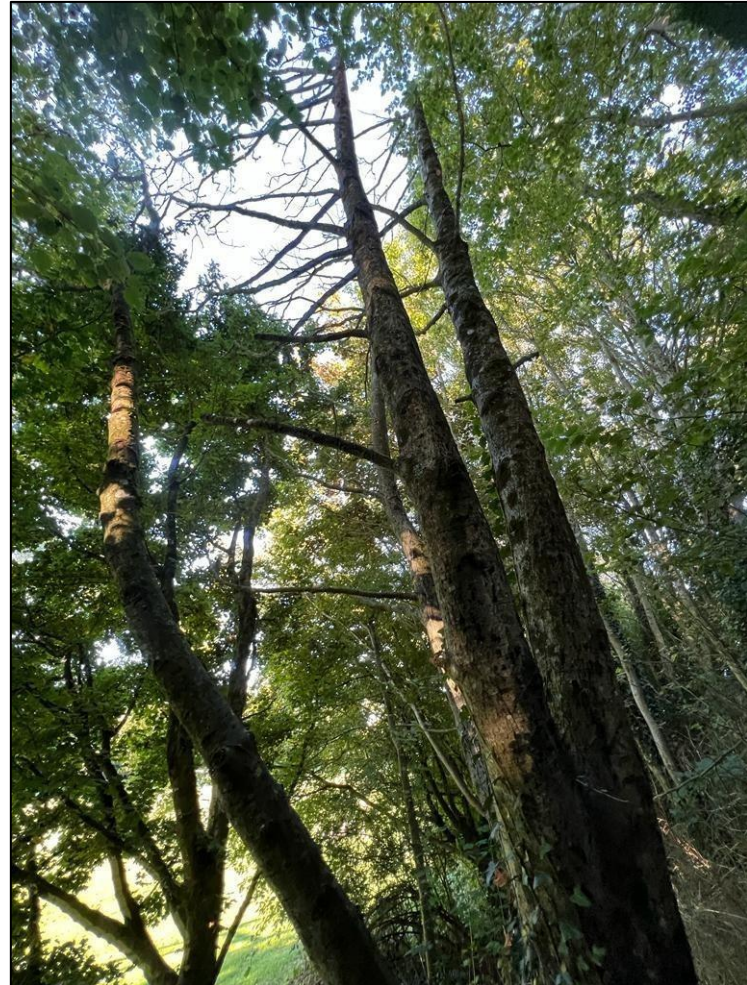

Photo 13 – Dumping of green waste (G5)

Photo 14 – Dead hornbeam tree (T4)

Photo 15 – Dead Alder trees

Photo 16 – Compression fork on hornbeam (T5)

Photo 17 _ Compression fork on hornbeam (T6)

Photo 18 _ Branches impinging the highway along Dorchester Road

Photo 19 – Compression fork on Lime tree (T8)

Photo 20 – Crown raise required on lime tree (T9)

Photo 21 _ Branch pushing on cable on lime tree (T10)

Photo 22 _ Compression forks on hornbeam (T11)

Photo 23 _ Failed union on potentially dead tree (T12)

Photo 24 _ Ivy covering compression form on sycamore tree (T13)

Photo 25 _ Hazard beam cavities on sycamore tree (T14)

Photo 26 _ Low crown on Persian Ironwood tree (T19)

Photo 27 Compression fork on beech
union and old guard on lime tree (T26)

tree (T20)

Photo 28 – vegetation in main

Photo 29 Basal suckering on lime tree (T28)

Photo 30 – Lime tree (T28) branches impeding street light

Photo 31 low crown over green of lime tree (T28)

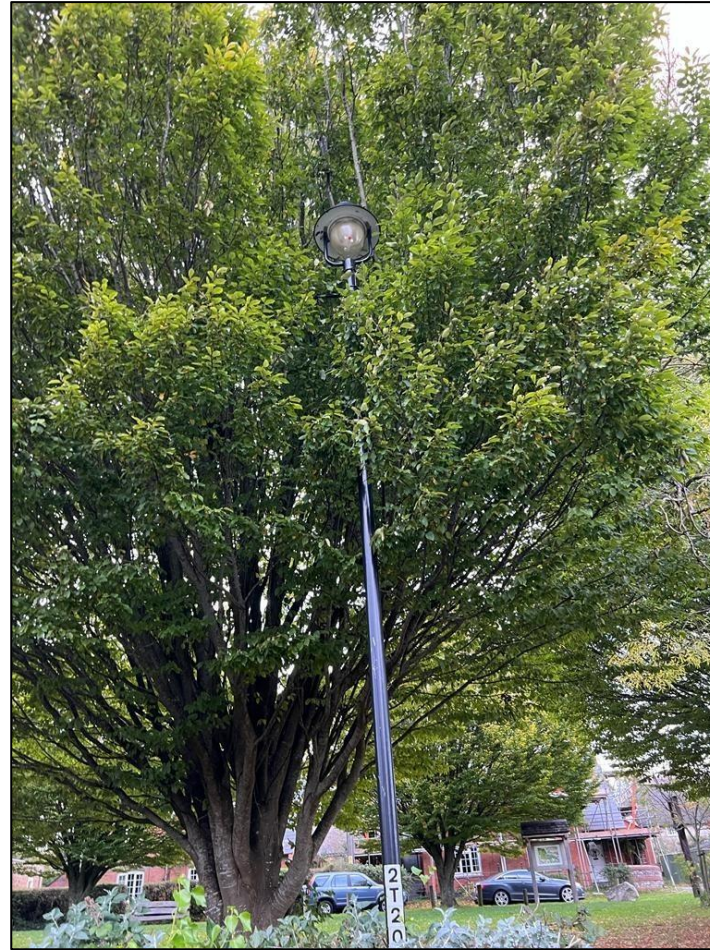

Photo 32 – Hornbeam tree (T31) branches impeding street light
